2.0 Product Description					
Product	Display (LCD Monitor)				
Brand Name	AOC				
Description	The product covered by this report is a Display (LCD Monitor)				
Models	24E2D(24E2);24E2DA(24E2);24E2H(24E2); 24P2Q(24P2);24P2U(24P2);24P2C(24P2)				
Model Similarity	Model Name:24E2D, 24E2DA,24E2H, 24P2Q, 24P2U,24P2C Model Number:24E2,24P2 24E2 is equipped with rotatable pivot and 24P2 without rotatable pivot. Different model name means different sales region.				
Ratings	100-240Vac,50/60Hz,1.5A				
Other Ratings	NA				
Date Available	10/25/2019	Market Availability	Yes	OEM	TPV Electronics(Fujian) Co. Ltd
Major Markets	Canada,Japan,Taiwan,United States				
Trans Type	Initial Certification: Model Meets ENERGY STAR Requirements				
Notes	NA				
Additional Model Details (Optional)	Model Name and Number	Identifying Information			
Original Certificate Actual Issued Date for Model Tested (Only Applies to Revised Reports)					NA

NOTES:

- 1) Not all item numbers are indicated (called out) in the photos, as their location is obvious.
- 2) "Various" means any type, from any manufacturer that complies with the "Technical data and securement means" and meets the "Mark(s) of conformity" can be used.
- 3) Indicates specific marks to be verified, which assures the agreed level of surveillance for the component. "NR" - indicates: a) Unlisted and only visual examination is necessary or b) marks are not required to be verified.

### **5.0 Critical Unlisted CEC Components**

Periodic Evaluation of Critical Unlisted Components by the Intertek Component Evaluation Centers (CEC) is not required under the INTERTEK ENERGY STAR Program.

## 6.0 Critical Features

Critical Features/Components - An essential part, material, subassembly, system, software, or accessory of a product that has a direct bearing on the product's conformance to applicable requirements of the ENERGY STAR® Program Requirements.

Listed Component - A component part, which has been previously Listed or Certified by an accredited Certification Organization with no restrictions and is used in the intended application within its ratings.

Recognized Component - A component part, which has been previously evaluated by an accredited certification body with restrictions and must be evaluated as part of the basic product considering the restrictions as specified by the Conditions of Acceptability.

Unlisted Component - A part that has not been previously evaluated to the appropriate designated component standard. It may also be a Listed or Recognized component that is being used outside of its evaluated Listing or component recognition.

Construction Details - For specific construction details, reference should be made to the photographs and descriptions. All dimensions are approximate unless specified as exact or within a tolerance. In addition to the specific construction details described in this Report, the following general requirements also apply.

1. Product Safety Compliance - NA

2. EMI Compliance - NA

3. Schematics - NA

4. Installation, Operating and Safety Instructions - Instructions for installation and use of this product are provided by the manufacturer. Refer to Illustration No.1-2 for details.

5. Package Markings - NA

6. Warranty Information - NA

7. Marking Label - Refer to Illustration No.3.for details.

## Safety

### National Conventions

The following subsections describe notational conventions used in this document.

#### Notes, Cautions, and Warnings

Throughout this guide, blocks of text may be accompanied by an icon and printed in bold type or in italic type. These blocks are notes, cautions, and warnings, and they are used as follows:

**NOTE:** A NOTE indicates important information that helps you make better use of your computer system.

**CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**WARNING:** A WARNING indicates the potential for bodily harm and tells you how to avoid the problem. Some warnings may appear in alternate formats and may be unaccompanied by an icon. In such cases, the specific presentation of the warning is mandated by regulatory authority.

## 7.0 Illustrations

### Illustration 2 - Installation and Safety instruction (Continued)

#### Connecting the Monitor

Cable Connections In Back of Monitor and Computer:

1. Power
2. Analog (D-Sub 15-Pin VGA cable)
3. DVI
4. HDMI
5. Earphone
6. DisplayPort

#### Connect to PC

1. Connect the power cord to the back of the display firmly.
2. Turn off your computer and unplug its power cable.
3. Connect the display signal cable to the video connector on the back of your computer.
4. Plug the power cord of your computer and your display into a nearby outlet.
5. Turn on your computer and display.

If your monitor displays an image, installation is complete. If it does not display an image, please refer Troubleshooting.

To protect equipment, always turn off the PC and LCD monitor before connecting.

<b>8.0 Test Summary</b>			
Evaluation Period	4/16/2020-4/16/2020		Project No. 200302963SHA
Sample Rec. Date	1-Apr-2020	Condition Prototype	Sample ID. 0200401-77-086
Test Location	Intertek Testing Services Shanghai Limited EPA ID(1105997) Building No.86, 1198 Qinzhou Road (North), Shanghai 200233, China		
Test Procedure	Testing Lab	Test type	Qualification
Determination of the result includes consideration of measurement uncertainty from the test equipment and methods. The product was tested as indicated below with results in conformance to the relevant test criteria.			
The following requirements were evaluated:			
Required Submittal Information			Submittal Data

<b>8.0 Test Summary</b>	
Measured Off Mode Power at 115 Volts W	0.1
Reported Off Mode Power at 115 Volts W	0.1
Measured Total Energy Consumption at 115 Volts kWh	44.63
Reported Total Energy Consumption at 115 Volts kWh	44.63
Max Total Energy Consumption Limit for Monitor kWh	45.73
On Mode Power at 12 Lux at 230 Volts W	
On Mode Power at 300 Lux at 230 Volts W	
Measured On Mode Power at 230 Volts W	14.58
Measured Sleep Mode Power at 230 Volts W	0.14
Measured Disconnected Sleep Mode Power at 230 Volts W	
Measured Off Mode Power at 230 Volts W	0.13
Measured Total Energy Consumption at 230 Volts kWh	45.5
True Power Factor PF During On Mode Testing at 115 Volts W	0.5
True Power Factor PF During On Mode Testing at 230 Volts W	0.39
Color Spaces Supported*	sRGB
Available Signal or Data Interfaces*	VGA,DVI
Model Features*	Built-In Speakers
Features Enabled in Default On Mode*	Built-In Speakers
Features Enabled in Default Sleep Mode*	None
Wireless Technologies Supported*	None
Ethernet Supported*	None
Power Source*	Ac to dc internal power supply
Mechanism for Automatically Entering Sleep or Off Mode*	Display Power Management Signaling
On Mode Power at 12 Lux at 100 Volts 50Hz W	
On Mode Power at 300 Lux at 100 Volts 50Hz W	
Measured On Mode Power at 100 Volts 50Hz W	14.41
Measured Sleep Mode Power at 100 Volts 50Hz W	0.1
Measured Disconnected Sleep Mode Power at 100 Volts 50Hz W	
Measured Off Mode Power at 100 Volts 50Hz W	0.1
Measured Total Energy Consumption at 100 Volts 50Hz kWh	44.75
On Mode Power at 12 Lux at 100 Volts 60Hz W	
On Mode Power at 300 Lux at 100 Volts 60Hz W	
Measured On Mode Power at 100 Volts 60Hz W	14.42
Measured Sleep Mode Power at 100 Volts 60Hz W	0.1
Measured Disconnected Sleep Mode Power at 100 Volts 60Hz W	
Measured Off Mode Power at 100 Volts 60Hz W	0.1
Measured Total Energy Consumption at 100 Volts 60Hz kWh	44.78

<b>8.1 Signatures</b>			
A representative sample of the product covered by this report has been evaluated and found to comply with the applicable requirements of the standards indicated in Section 1.0.

## 10.0 General Information

The Applicant has agreed to produce products in accordance with the requirements of this report and to maintain compliance with all ENERGY STAR Product Specification requirements.

### Changes to Product Design / Alternate Components

As part of this agreement, the Applicant also has agreed to notify Intertek and to request authorization prior to making any changes to the product (including but not limited to using alternate parts, components or materials) which may effect compliance with the ENERGY STAR Product Specification. Those parts, components or materials identified as critical have been listed in Section 4.0 of this report.

### Product Surveillance

Under this Program, market surveillance is conducted on an annual basis. For each Product Type defined in the EPA ENERGY STAR Program, Intertek will select 10% of those certified products for Verification Testing in accordance with the requirements of the EPA ENERGY STAR Product Specification.

The primary source for products under Verification Testing will be the retail market. Applicants whose products are selected for Verification Testing are required to provide a list of locations where the product might be obtained. The Applicant is responsible for the cost of procurement and the Verification Tests. Should products not be readily available on the retail market, the Applicant is required to provide access to distribution warehouses to allow selection of those products. Should the product not be available on the retail market or if procurement from the retail market is not feasible, then alternate arrangements for Verification Testing will be made by the Intertek Certification Body.

As a general rule under the Verification Testing requirements, the products must achieve energy values within 5% of the required Tier Limit.

### Compliance with ENERGY STAR Product Specifications under Verification Testing

Products found non-compliant with ENERGY STAR Product Specification under Verification Testing, will be reported to the EPA within 48 hours and the product removed from the ENERGY STAR Program. If it is determined during Verification Testing that changes have been made to product design or critical components, the Certification Body may increase Verification Testing frequency of those products.

## 10.1 Evaluation of Unlisted Components

Because Unlisted Components are uncontrolled, and they do not fall under a third party follow up program, Intertek may require these components to be tested and/or evaluated at least once annually, more often for certain components, as part of the independent certification process. The Unlisted Components in Section 5.0 require testing and/or evaluation as indicated.

**Note to Intertek Follow Up Inspector: The Component Evaluation Center, CEC, will notify you in writing when these components must be selected and sent to the CEC for re-evaluation**

Ship the samples to:  
Intertek Testing Services Shanghai Limited  
ETL Component Evaluation Center  
Building No. 86, 1198 Qinzhou Road (North)  
Shanghai 200233, China  
Attn: Ms. Angela Han

Sample Disposition: Due to the destructive nature of the testing, all samples will be discarded at the conclusion of testing unless, the manufacturer specifically requests the return of the samples. The request for return must accompany the initial component shipment.

### **11.0 Manufacturing and Production Tests**

Manufacturing and Production tests are not required under the INTERTEK ENERGY STAR Program. However, Intertek encourages the use of such ongoing product testing to ensure compliance with the EPA ENERGY STAR Product Specifications.
