2.0 Product Description			
Product	Display (LCD Monitor)		
Brand name	AOC		
Description	The product covered by this report is a LCD Display (LED backlighting) The evaluation standard of this report is based on: ENERGY STAR Program Requirements Product Specification for Displays Eligibility Criteria Version 7.0 And the test specification of this report refer to: IEC 62301:2011(Ed.2.0): Household electrical appliances -Measurement of standby power IEC 62087:2011(Ed.3.0): Methods of measurement for the power consumption of audio, video and related equipment		
Models	I2375PQU(230LM00033)		
Model Similarity	Model Name:I2375PQU Model Number:230LM00033		
Ratings	100-240Vac;50/60Hz;1.5A		
Other Ratings	NA		
Date available	08/22/2016	Market availability	Yes
		Last Mfg date	NA
Major Markets	Australia,New Zealand,Canada,Europe,Japan,Switzerland,Taiwan,United States		
Trans Type	Initial Certification: Model Meets ENERGY STAR Requirements		
Notes	NA		
Additional model details (optional)	Model Name or Number	Identifying Information	
Original Certificate actual issued date for model tested (only applies to revised reports)			NA

2) "Various" means any type, from any manufacturer that complies with the "Technical data and securement means" and meets the "Mark(s) of conformity" can be used.

3) Indicates specific marks to be verified, which assures the agreed level of surveillance for the component. "NR" - indicates: a) Unlisted and only visual examination is necessary or b) marks are not required to be verified.

#### **5.0 Critical Unlisted CEC Components**

Periodic Evaluation of Critical Unlisted Components by the Intertek Component Evaluation Centers (CEC) is not required under the INTERTEK ENERGY STAR Program.

**6.0 Critical Features**

Critical Features/Components - An essential part, material, subassembly, system, software, or accessory of a product that has a direct bearing on the product's conformance to applicable requirements of the ENERGY STAR® Program Requirements.

Listed Component - A component part, which has been previously Listed or Certified by an accredited Certification Organization with no restrictions and is used in the intended application within its ratings.

Recognized Component - A component part, which has been previously evaluated by an accredited certification body with restrictions and must be evaluated as part of the basic product considering the restrictions as specified by the Conditions of Acceptability.

Unlisted Component - A part that has not been previously evaluated to the appropriate designated component standard. It may also be a Listed or Recognized component that is being used outside of its evaluated Listing or component recognition.

Construction Details - For specific construction details, reference should be made to the photographs and descriptions. All dimensions are approximate unless specified as exact or within a tolerance. In addition to the specific construction details described in this Report, the following general requirements also apply.

1. Product Safety Compliance - NA
2. EMI Compliance - NA
3. Schematics - NA
4. Installation, Operating and Safety Instructions - Instructions for installation and use of this product are provided by the manufacturer. Refer to Illustration No.1.2.for details.
5. Package Markings - NA
6. Warranty Information - NA
7. Marking Label - Refer to Illustration No.3.for details.

## Safety

### National Conventions

The following subsections describe notational conventions used in this document.

#### Notes, Cautions, and Warnings

Throughout this guide, blocks of text may be accompanied by an icon and printed in bold type or in italic type. These blocks are notes, cautions, and warnings, and they are used as follows:

**NOTE:** A NOTE indicates important information that helps you make better use of your computer system.

**CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**WARNING:** A WARNING indicates the potential for bodily harm and tells you how to avoid the problem. Some warnings may appear in alternate formats and may be unaccompanied by an icon. In such cases, the specific presentation of the warning is mandated by regulatory authority.

### Power

The monitor should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.

The monitor is equipped with a three-pronged grounded plug, a plug with a third (grounding) pin. This plug will fit only into a grounded power outlet as a safety feature. If your outlet does not accommodate the three-wire plug, have an electrician install the correct outlet, or use an adapter to ground the appliance safely. Do not defeat the safety purpose of the grounded plug.

Unplug the unit during a lightning storm or when it will not be used for long periods of time. This will protect the monitor from damage due to power surges.

Do not overload power strips and extension cords. Overloading can result in fire or electric shock.

The wall socket shall be installed near the equipment and shall be easily accessible.

## 7.0 Illustrations

### Illustration 2 - Installation, Operating and Safety Instructions(continued)

Cable Connections In Back of Monitor and Computer:

- 1 Power
- 2 Display port
- 3 HDMI/MHL
- 4 DVI
- 5 Analog (D-Sub 15-Pin VGA cable)
- 6 AUDIO IN
- 7 Earphone out
- 8 USB 2.0
- 9 USB 3.0 Upstream
- 10 USB 3.0
- 11 USB 3.0+ fast charging

To protect equipment, always turn off the PC and LCD monitor before connecting.

- 1 Connect the power cable to the AC port on the back of the monitor.
- 2 Connect one end of the 15-pin D-Sub cable to the back of the monitor and connect the other end to the computer's D-Sub port.
- 3 Optional – (Requires a video card with DVI port) – Connect one end of the DVI cable to the back of the monitor and connect the other end to the computer's DVI port.
- 4 Optional – (Requires a video card with HDMI port) – Connect one end of the HDMI cable to the back of the monitor and connect the other end to the computer's HDMI port.
- 5 Optional – (Requires a video card with DP port) – Connect one end of the DP cable to the back of the monitor and connect the other end to the computer's DP port.
- 6 Turn on your monitor and computer.

<b>8.0 Test Summary</b>	
Measured Sleep Mode Power at 115 Volts_W	0.28
Reported Sleep Mode Power at 115 Volts_W	0.28
Measured Disconnected Sleep Mode Power at 115 Volts_W	0.28
Maximum Sleep Mode Power Limit for Signage Certification_W	
Measured Off Mode Power at 115 Volts_W	0.12
Reported Off Mode Power at 115 Volts_W	0.12
Measured Total Energy Consumption at 115 Volts_kWh	49.2
Reported Total Energy Consumption at 115 Volts_kWh	49.2
Max Total Energy Consumption Limit for Monitor_kWh	50.8
On Mode Power at 12 Lux at 230 Volts_W	
On Mode Power at 300 Lux at 230 Volts_W	
Measured On Mode Power at 230 Volts_W	15.38
Measured Sleep Mode Power at 230 Volts_W	0.34
Measured Disconnected Sleep Mode Power at 230 Volts_W	0.34
Measured Off Mode Power at 230 Volts_W	0.19
Measured Total Energy Consumption at 230 Volts_kWh	49.08
True Power Factor PF During On Mode Testing at 115 Volts_W	0.5
True Power Factor PF During On Mode Testing at 230 Volts_W	0.5
Number of Sleep Modes in Addition to Default Sleep Mode*	0
Color Spaces Supported*	NTSC
Available Signal or Data Interfaces*	DVI,VGA,HDMI 1.4,DisplayPort 1.2
Model Features*	None
Features Enabled in Default On Mode*	None
Features Enabled in Default Sleep Mode*	None
Wireless Technologies Supported*	None
Low Power Wireless Technologies*	None
Ethernet Supported*	None
Power Source*	Ac power supply
Mechanism for Automatically Entering Sleep or Off Mode*	Display Power Management Signaling
On Mode Power at 12 Lux at 100 Volts_50Hz_W	
On Mode Power at 300 Lux at 100 Volts_50Hz_W	
Measured On Mode Power at 100 Volts_50Hz_W	15.81
Measured Sleep Mode Power at 100 Volts_50Hz_W	0.27
Measured Disconnected Sleep Mode Power at 100 Volts_50Hz_W	
Measured Off Mode Power at 100 Volts_50Hz_W	0.11
Measured Total Energy Consumption at 100 Volts_50Hz_kWh	50.02
On Mode Power at 12 Lux at 100 Volts_60Hz_W	
On Mode Power at 300 Lux at 100 Volts_60Hz_W	
Measured On Mode Power at 100 Volts_60Hz_W	15.5
Measured Sleep Mode Power at 100 Volts_60Hz_W	0.27
Measured Disconnected Sleep Mode Power at 100 Volts_60Hz_W	
Measured Off Mode Power at 100 Volts_60Hz_W	0.11
Measured Total Energy Consumption at 100 Volts_60Hz_kWh	49.07

<b>8.1 Signatures</b>			
A representative sample of the product covered by this report has been evaluated and found to comply with the applicable requirements of the standards indicated in Section 1.0.

## 10.0 General Information

The Applicant has agreed to produce products in accordance with the requirements of this report and to maintain compliance with all ENERGY STAR Product Specification requirements.

### Changes to Product Design / Alternate Components

As part of this agreement, the Applicant also has agreed to notify Intertek and to request authorization prior to making any changes to the product (including but not limited to using alternate parts, components or materials) which may effect compliance with the ENERGY STAR Product Specification. Those parts, components or materials identified as critical have been listed in Section 4.0 of this report.

### Product Surveillance

Under this Program, market surveillance is conducted on an annual basis. For each Product Type defined in the EPA ENERGY STAR Program, Intertek will select 10% of those certified products for Verification Testing in accordance with the requirements of the EPA ENERGY STAR Product Specification.

The primary source for products under Verification Testing will be the retail market. Applicants whose products are selected for Verification Testing are required to provide a list of locations where the product might be obtained. The Applicant is responsible for the cost of procurement and the Verification Tests. Should products not be readily available on the retail market, the Applicant is required to provide access to distribution warehouses to allow selection of those products. Should the product not be available on the retail market or if procurement from the retail market is not feasible, then alternate arrangements for Verification Testing will be made by the Intertek

As a general rule under the Verification Testing requirements, the products must achieve energy values within 5% of the required Tier Limit.

### Compliance with ENERGY STAR Product Specifications under Verification Testing

Products found non-compliant with ENERGY STAR Product Specification under Verification Testing, will be reported to the EPA within 48 hours and the product removed from the ENERGY STAR Program. If it is determined during Verification Testing that changes have been made to product design or critical components, the Certification Body may increase Verification Testing frequency of those products.

## 10.1 Evaluation of Unlisted Components

Because Unlisted Components are uncontrolled, and they do not fall under a third party follow up program, Intertek may require these components to be tested and/or evaluated at least once annually, more often for certain components, as part of the independent certification process. The Unlisted Components in Section 5.0 require testing and/or evaluation as indicated.

**Note to Intertek Follow Up Inspector: The Component Evaluation Center, CEC, will notify you in writing when these components must be selected and sent to the CEC for re-evaluation**

Ship the samples to:  
Intertek Testing Services Shanghai Limited  
ETL Component Evaluation Center  
Building No. 86, 1198 Qinzhou Road (North)  
Shanghai 200233, China  
Attn: Ms. Dansy Xu

Sample Disposition: Due to the destructive nature of the testing, all samples will be discarded at the conclusion of testing unless, the manufacturer specifically requests the return of the samples. The request for return must accompany the initial component shipment.

### **11.0 Manufacturing and Production Tests**

Manufacturing and Production tests are not required under the INTERTEK ENERGY STAR Program. However, Intertek encourages the use of such ongoing product testing to ensure compliance with the EPA ENERGY STAR Product Specifications.

<b>12.0 Revision Summary</b>				
The following changes are in compliance with the declaration of Section 8.1:				
Date/ Proj # Site ID	Project Handler/ Reviewer	Section	Item	Description of Change
				None
