Q3279VWF

Experience great resolution in style: 31.5" all-rounder

Dive deep into details; Huge MVA display in QHD resolution brings high colour depth and contrast in a stylish design. FreeSync, 75Hz refresh rate and 5 ms response time for smooth gameplay.

Features

QHD Resolution

With 2560 x 1440 resolution, Quad HD (QHD) offers superior picture quality and sharp imagery that reveals the finest details. The widescreen 16:9 aspect ratio provides plenty of space to spread out and work, plus allows you to enjoy games or movies in their original size.

Big screen size

Big screen sizes give you more room to play with applications, boosting your productivity. For resolutions equal to or higher than QHD, big screen sizes result in a comfortable pixel density, eliminating the need for scaling. Break your chains - immerse yourselves in movies/games on huge displays!

Freesync

The AMD FreeSync Technology ensures that the GPU's and monitor's refresh rates are synchronised, which provides a smooth, tear free gaming experience. You will appreciate the low input lag if you're looking for the best quality visuals in fast paced games.

Flicker Free

AOC Flicker-Free Technology utilises a DC (Direct Current) backlight panel, reducing flickering light levels. With eye strain and fatigue absolutely minimized, feel free to enjoy those long, intense gaming sessions in comfort!

Low Blue Light

AOC Lowblue Light protects you from harmful blue light which, during long sessions, has been shown to cause eye strain, headaches, and sleeping disorders. Our Lowblue Light feature reduces the harmful wavelengths emitted without sacrificing color composition, setting the experience free from the worry of eye damage.
